SUMMARY

Frontend Software Engineer and 2025 MS graduate (FAST-NUCES, CGPA 3.23/4.00) with 6+ years of experience building production web applications in React and TypeScript for fintech, payroll and B2B SaaS products serving clients in the US, UK and Middle East. I work closely with Product Designers to turn Figma wireframes and mockups into polished user interfaces, build design-system components that keep the UI consistent, and ship with confidence using Jest, React Testing Library and Cypress with a TDD approach. Proactive, results-driven problem solver, comfortable in fast-paced, diverse, global teams, and open to relocating to the UK, UAE and Europe.

EDUCATION

MS in Data Science, FAST-NUCES (FAST National University), Karachi | CGPA 3.23 / 4.00 **2023 – 2025**

BS in Computer Science, FAST-NUCES, Karachi **2016 – 2020**

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Redux (Redux Toolkit), React Query, Next.js, HTML5, CSS3, Tailwind CSS, Webpack (Module Federation), Micro-frontends, Storybook, ShadCN UI, Responsive UI

Testing: Jest, React Testing Library, Cypress, Playwright, Test-Driven Development (TDD), unit, integration and end-to-end testing

Design and Delivery: Figma, wireframes and mockups, prototyping, design systems, visual guidelines, Agile, Jira, Confluence

Backend and Tools: Node.js, NestJS, Express, REST APIs, Java (Spring Boot), Kafka, PostgreSQL, Docker, Jenkins CI/CD, Git, PostHog

PROFESSIONAL EXPERIENCE

Techlogix, Karachi, Pakistan **Aug 2022 – Present**

Principal Software Engineer (Jul 2025 – Present) | Senior Software Engineer (Aug 2022 – Jul 2025)

- Collaborate with Product Designers on new feature design, building user interfaces from Figma wireframes and mockups through to release, and prototyping and iterating on new interactions based on user and stakeholder feedback.
- Built and maintain a Storybook design system of 100+ reusable React and TypeScript components (Tailwind CSS, ShadCN patterns), defining visual guidelines for consistency across apps and cutting feature development time by ~20%.
- Shipped a React and TypeScript Microsoft Word add-in used by 500+ B2B users of Awarded AI (US proposal platform), delivering AI-powered writing suggestions inline, and added PostHog product analytics to measure engagement.
- Designed a micro-frontend architecture with Webpack Module Federation so teams could deploy independently; built large-scale React and Next.js apps with Redux Toolkit and React Query.
- Built the frontend Identity and Access Management (IAM) module from scratch for Atlas HXM (global payroll and workforce platform): authentication, authorisation and RBAC flows with SSO via Azure AD, Okta and Keycloak.
- Write tests first (TDD) with Jest, React Testing Library and Cypress, keeping releases regression-free; review code and set frontend best practices for the team.
- Improved frontend performance by removing unnecessary re-renders, code-splitting bundles and optimising data fetching.
- Deliver features for a UAE exchange house's payments platform (Wage Protection System payroll, payroll cards and inward remittance) using Spring Boot services and Kafka event streaming at high transaction volumes.
- Own delivery end to end: track tasks in Jira and share progress updates with global teams across US, UK and UAE time zones.

Creative Chaos, Karachi, Pakistan **Mar 2021 – Jul 2022**

Software Engineer

- Built React and TypeScript user interfaces and Node.js / Express REST APIs for multiple client products, creating reusable Storybook components.
- Implemented JWT and OAuth 2.0 authentication flows and integrated third-party APIs (HubSpot, PandaDoc, Google Drive).
- Wrote unit and integration tests with Jest and React Testing Library; automated deployments with Docker and Jenkins CI/CD.

Cygnis Media, Karachi, Pakistan **Sep 2020 – Mar 2021**

Full Stack Engineer

- Built responsive web applications with Vue.js and Node.js for health-management products.
- Integrated the Square payment gateway for a live ticketing product and implemented OAuth 2.0 sign-in.

AWARDS, CERTIFICATION AND LANGUAGES

Awards: 3x Achiever of the Month (AOTM) at Techlogix for engineering excellence | **Certification:** Advanced React Component Patterns (Udemy)

Languages: English (fluent), Urdu (native)
